

Hello, my name is Morten

For more than a decade, I have been
developing advanced yet easily
maintainable frontend solutions for the web.

Morten Kozak Fischer

Senior Frontend Developer
at Capgemini Denmark A/S

Microsoft Exam: 70-480

- ✓ JavaScript
- ✓ ES6/Babel
- ✓ Vue.js
- ✓ React.js
- ✓ Webpack/Grunt
- ✓ SCSS
- ✓ WCAG/Accessibility
- ✓ UI/UX
- ✓ Design

Certified by Microsoft and more than 10 years of field experience with HTML, CSS and JavaScript

With a deep passion for UI I work carefully in turning requirements and often static layouts into living responsive interactive experiences, that works well across browsers, devices and users. All with respect for business needs and goals.

Experienced web developer

Over the years I have participated in all stages of a web project including stakeholder management, visual responsive interface design and leading teams through the technical builds.

I have learned the hard way the importance of writing well structured and compliant code and markup that is easy to maintain and read by my peers. On a frontend scene, that can be considered fast moving and very technical, any technology choices should be matching project and business goals – current and future.

More than tech

Over the years I have gathered experience in leading and supporting teams. Both local teams and distributed teams separated by thousands of kilometres. I have bridged the gaps between delivery and business by managing stakeholders and business representatives. Helping them in requirements clarification and writing agile user stories that complies with the Definition of Ready specified by the development team.

Agile mindset

On several occasions over the years, I have served as Scrum Master. Helping developers and stakeholders to understand the agile principles, and how said principles can increase both value and quality of the delivered increments.

Present

Senior Frontend Developer

Capgemini Sogeti Danmark A/S

April 2017 - present

2017

Senior Frontend Developer

Enetpulse Danmark ApS

July 2013 - March 2017

CORS

PHP

My life

I am married to Sarah and together we have a daughter, Aya, born in may 2017. We live in a small town close to family and friends. While my time for it is limited nowadays, I have always been an avid gamer enjoying mostly RTS and space games. Other interests include family, friends, astronomy and piano playing.

Date of birth: 20th of November 1978
